The preferred waste management system shall focus on the following points, namely:—

- I. Reduction and reuse at source: The most preferred option for Solid Waste Management shall be prevention of waste generation. It will be helpful in reducing the handling, treatment and disposal costs and specially reduce various environmental impacts such as leachate, air emissions and generation of greenhouse gases.
- II. Waste recycling: Recovery of recyclable material resources through a process of segregation, collection and re-processing to create new products shall be the next preferred alternative.
- III. Composting: As far as possible the organic fraction of waste shall be composted and used to improve soil health and agricultural production adhering to norms.

- IV. Waste-to-Energy: Where material recovery from waste is not possible, energy recovery from waste through production of heat, electricity or fuel may be preferred. Bio-methanation, waste incineration, production of Refuse Derived Fuel (RDF) and co-processing of the sorted dry rejects from municipal solid waste are to be commonly adopted “Waste to Energy” technologies.
- V. Waste disposal: Remaining residual waste, which ideally comprises of inerts, shall be disposed in sanitary landfills constructed in accordance with stipulations of the Solid Waste Management Rules, 2016.
- VI. The Integrated Solid Waste Management system shall be environment friendly. Waste minimization, waste recycling, waste-to-energy strategies and landfill gas capture and use which are promoted in the Solid Waste Management Rules, 2016 shall be adopted for reduction of greenhouse gases.

- h. Waste from the slaughter house, fish market, fruit & vegetable market is biodegradable in nature, so proper storage facility should be designed so that no health hazard spreads from this & facility for composting should be developed to make use of such waste in generating organic manure from it. For ensuring proper disposal of such waste every generator have to ensure best storage facility and segregation of such waste at source and door to door collection should be practiced by ULBs to collect 100% of such waste and take to processing plant. On Violation, waste generator should be fined on the spot or punished and can be subjected to court as per rule.
- i. Nagar Panchayat have to establish waste deposition centres for domestic hazardous waste and give direction for waste generators to deposit domestic hazardous wastes at this centre for its safe disposal. Such facility shall be established in a city or town in a manner that one centre is set up for the area of twenty square kilometres or part thereof and notify the timings of receiving domestic hazardous waste at such centres.
- j. Bio medical & industrial waste should not be mixed with municipal waste and such waste should be stored and disposed separately as per the rules applicable. For the disposal of bio-medical waste common Biomedical Waste treatment facility

(CBMWTF) should be developed in each ULB either separately or on the cluster basis. By paying the fixed user fee such waste can be easily disposed off.

- k.* Construction and demolition waste should be store separately as and when generated, in his/her own premises and shall be disposed off as per the Construction and Demolition Waste Management Rules, 2016. ULBs should fix user charge for transportation and disposal of C&D waste and generator should dispose this waste by paying the charge as per the rules and at the designated place. Disposing of such waste in open space, road side and common place will be treated as illegal and fined as per the rules.

Waste so collected shall be collected and disposed of at regular intervals as decided by the local body.
- r.* Nagar Panchayat can develop bins free solid waste management facility but for this 100% waste collection from the door step of the generator should be ensured.

**7. Secondary Collection & Transportation of Municipal Solid Waste.**—(a) Each storage bins/secondary storage bins should be attended daily by the help of auto tipper, tractor, compactor etc.

(b) Closed vehicle should be used for the transportation of waste. To reduce the frequency of loading and unloading of waste compactor should be used.

(c) Nagar Panchayat will have to ensure safe storage and transportation of the domestic hazardous waste to the hazardous waste disposal facility.

(d) Transport segregated bio-degradable waste to the processing facilities like compost plant, bio-methanation plant or any such facility. Preference shall be given for onsite processing of such waste.

(e) Transport non-bio-degradable waste to the respective processing facility or material recovery facilities or secondary storage facility. Ensure transportation of construction and demolition waste as per the provisions of the Construction and Demolition Waste Management Rules, 2016.

#### CHAPTER-IV

### MUNICIPAL SOLID WASTE PROCESSING & DISPOSAL

**8. Waste Processing Plant.**—Nagar Panchayat with help of State Pollution Control Board approval needs to develop solid waste management/processing plant to make use of daily generated bio-degradable waste so that it can reduce the quantity of waste being disposed at the sanitary land fill site:—

- (a) Nagar Panchayat have to collect waste from vegetable, fruit, flower, meat, poultry and fish market on day to day basis and promote setting up of decentralised compost plant or bio-methanation plant at suitable locations in the markets or in the vicinity of markets ensuring hygienic conditions.
- (b) Involve communities in waste management and promotion of home composting, bio-gas generation, decentralised processing of waste at community level subject to control of odour and maintenance of hygienic conditions around the facility.
- (c) For processing of bio-degradable waste Nagar Panchayat have to establish waste processing plant such as composting plant—windrow compost plant, vermicomposting plant, waste to energy or any other such technology by their own or with help of any other licensed company/firm /organisation on Build—operate - transfer (BOT)/object oriented (OO) method.
- (d) For processing of mixed recyclable waste Nagar Panchayat have to establish recycling unite such as incineration, RDF Plant or other such recycling technology by their own or with help of any other licensed company/firm /organisation on Build—operate-transfer (BOT)/object oriented (OO) method.
- (e) Municipality may also send the non-biodegradable/dry waste as RDF to nearby cement factories for co-processing.

(e) Nagar Panchayat have to ensure that in absence of the potential of bio-mining and bio-remediation of dumpsite, it shall be scientifically capped as per landfill capping norms to prevent further damage to the environment.
